Above figures are for plasterboard on dabs internal finishes, other finishes will be similar, consult Technical Services for specific values
Insulation products named correct at time of issue. All thicknesses shown may not be available for each product but have been included for comparison purposes.

Wall U-Values - Solid wall, internal insulation

TSD 04-03

U-value calculations in accordance with BS EN ISO 6946 and BRE Conventions for U-value Calculations, BR443

		Solar (2.9N/mm ²)	Standard (3.6N/mm ²)	High or Super Strength (7.3 or 8.7N/mm ²)
Internal Insulation	Board thickness (mm)	U-Value (W/m ² K)		
Gyproc Thermaline PIR insulated plasterboard	53 (R = 1.85W/m ² K)	0.28	0.30	0.33
	63 (R = 2.30W/m ² K)	0.25	0.27	0.28
	78 (R = 3.00W/m ² K)	0.21	0.22	0.24
	93 (R = 3.65W/m ² K)	0.18	0.20	0.21
Kingspan K118 insulated plasterboard	82.5 (R = 3.65W/m ² K)	0.18	0.20	0.21
	92.5 (R = 4.20W/m ² K)	0.17	0.18	0.18

All boards assumed as fixed on dabs for calculation purposes, consult board manufacturer for fixing recommendations

Above figures are for a traditional 20mm render external finish, other finishes will be similar, consult Technical Services for specific values

Details of boards named correct at time of issue. All thicknesses shown may not be available for each product but have been included for comparison purposes

Other board types/thicknesses may be used provided the proposed boards thermal resistance, R, is not less than that shown for appropriate U-value above
